## Shaping industrial spaces with sustainable façade solutions

**Metal Technology is proud to have contributed to Bartley Junction, a landmark 170,000 sq. ft. industrial and warehouse development located in Hook, Hampshire and delivered by Magrock.**

This eleven-unit scheme has been built with a strong focus on sustainability, targeting an EPC Rating of 'A' and BREEAM 'Excellent'. Our System 17 Curtain Walling and System 4-35 Hi+ High Performance Windows were expertly installed by i-Glaze Ltd on behalf of Ridgeway Facades, delivering both energy efficiency and sleek, modern aesthetics throughout the facility.

Projects like Bartley Junction demonstrate the critical role high-performance façade systems play in meeting today's environmental and design standards.
