Metal Technology's Silicone Pointed Curtain Walling makes for a super smart finish for refurbished shopfront

Metal Technology's System 17 Silicone Pointed Curtain Walling was utilised in this fantastic refurbishment of a shopfront at Fosse Retail Park in Leicester, designed by The Harris Partnership, fabricated by TITAN Facades and delivered by Stainforth Construction.

Metal Technology Ltd's System 17 SP Curtain Walling employs silicone-pointed double-glazed units which are fixed with concealed fixings into the system to give clean, uninterrupted external lines, creating a sleek appearance with high aesthetic values.

As with all MT systems, SP Curtain Walling is manufactured to exacting standards, always meeting, and in many cases exceeding, current building regulation requirements.
